Application Software main features:

- ✓ 'WYSIWIG' authoring tool
- ✓ Dynamic content management tools (periodic, automatic and programmable update of content)
- ✓ Web Site snapshot and RSS feeds (with Title, Articles and Pictures)

The screenshot shows the Fileas software interface. At the top left is the 'Fileas' logo. The main area is titled 'Profile News' and features a central image of a television set displaying a CD cover for 'Chaman of swings Live in Paris'. The background of the page is a collage of images including a person on a globe, a 'CONFERENCE' sign, and a 'PUBLIC' sign. Below the main image is a 'Last news' section with a text snippet about Philadelphia's wireless Internet project. On the right side, there is a 'Hide boxes' menu with options for 'Author & Title', 'External images', 'Internal images', 'Texts', and 'News'. On the left side, there are control buttons for 'Background image', 'Image modulation', 'Grid', 'Reinitialize', 'OK', and 'Cancel'. Several yellow callout boxes with arrows point to specific elements: 'CD Cover from Automation Software' points to the CD cover on the TV; 'Background image' points to the overall page background; 'Information Source & Type Definition' points to the 'News' option in the 'Hide boxes' menu; 'Text from Automation Software' points to the news text; and 'News from RSS feeds' points to the news text.
