DIGIDIA wins major contract for DAB tunnel break-in systems in Norway

DIGIDIA has won together with Norkring and TC Connect another major contract for DAB tunnel break-in in Norway. The total contract is for **33 DAB break-in systems to cover 46 tunnels** in the middle region of Norway. This contract comes in addition to the other contracts in Hålogaland and Hordaland and brings **DIGIDIA's** market share in Norway to over 60%.

ABOUT the **DAB BI 2.0 DAB Tunnel Break-in** product:

- Simultaneous multi-ensemble management for up to 4 ensembles
- SFN capability, synchronisation with GPS antenna signal
- Automatic Following of dynamic multiplex reconfigurations of DAB ensembles
- Unlimited number of encoders
- Compact: 1 box (483x350x177mm)
- Straight forward easy to use design with user friendly GUIs
- Remote control, maintenance and monitoring

Pascal Olivier,
DIGIDIA's CEO says:

“ We are very satisfied with this success in Norway in a very competitive environment. It is the fruit of 3 years of cooperation with TC Connect and Norkring, that allowed us to develop a compact, flexible and efficient product perfectly adapted to the needs of tunnel operators. **DIGIDIA** has already delivered DAB tunnel break-in systems to Hong Kong 4 years ago and we have recently delivered the first systems to Switzerland. With this contract **DIGIDIA** confirms its position as market leader for DAB break-in products. ”

/// About **DIGIDIA**

DIGIDIA has emerged as one of the leading companies for **digital radio equipment in Synchronous FM, DAB and DRM technology**. DIGIDIA's systems are installed all over the world and include encoders, multiplexers, IP gate ways, modulators, monitoring systems, professional receivers, tunnel break-in products and specific products and projects based on Software Defined Radio.
